- Scrum Master Expertise
- Product Roadmap Development
- User Story Prioritization
- UX Research & Analysis
- Project Lifecycle Management
- Project Deliverable Tracking
- Stakeholder Management
- Data-Driven Decision Making
- Project Management Software
- Issue Tracking & Resolution
- Team Leadership & Collaboration
- Knowledge Management
- Project Scheduling Visualization

PROFESSIONAL EXPERIENCE

Outliant - Austin, Texas (Remote)

October – 2023

Project & Product Management Intern

December – 2023

- Led Sprint Planning and facilitated daily Scrum Meetings to ensure team alignment and project delivery.
- Conducted Project Kickoff Meetings and facilitated Sprint Retrospectives for progress review, issue identification, and improvement implementation.
- Created and maintained comprehensive Notion documentation on company tools, processes, and project information, fostering knowledge sharing and team efficiency.
- Assisted in tracking project milestones using milestone calendars to ensure timely phase completion.
- Organized and analyzed data from Google Analytics and Page Speed Insights using Google Sheets to inform data-driven decisions and optimize project outcomes.
- Developed and delivered bi-weekly presentations to management, summarizing project progress, insights, and next steps.
- Designed detailed flowcharts and Gantt charts using Figma to visualize project timelines and workflows.
- Documented key points and action items from internal meetings, ensuring clear communication and follow-up on tasks.
- Utilized ClickUp to manage user stories, acceptance criteria, and tickets for various tasks (bug tracking, feature requests) to maintain project momentum and address issues promptly.
- Regularly reviewed and refined the product backlog to prioritize tasks, ensure requirement clarity, and align development efforts with strategic goals.

AkiraChix - Nairobi, Kenya

Feb – 2023

Software Development Student

December – 2023

- Developed interactive web applications using React JS, managing state and props for optimal user experience.
- Built RESTful APIs using the Django REST framework and implemented backend logic for various projects.
- Utilized Git for version control and collaborated effectively with remote teams on software development projects.
- Designed and implemented user interfaces using HTML, CSS, and Bootstrap frameworks.
- Developed mobile-friendly applications using React Native and implemented best practices for responsive design.

To Whom It May Concern,

I am writing this letter of recommendation for Margaret Wamboi, who interned with our Product / Project Management team from October 2, 2023 to December 21, 2023 over a three-month period.

During her internship, Margaret demonstrated a solid commitment to learning and understanding new processes. She engaged with various teams to understand our Internal Outliant processes and became familiar with the tools necessary for a Product Owner or Project Manager to maintain team organization and awareness. Margaret also contributed by brainstorming and iterating on her work to refine products and diagrams. She made efforts to ensure that documents were not only informative but also instructional and easy to read.

Margaret showed a willingness to take on new tasks and responsibilities, often meeting with team members to better understand different aspects of our operations. Her ability to adapt and her proactive approach allowed her to effectively contribute to our projects. Margaret's presentations and weekly updates reflected her growth and the knowledge she acquired during her time with us.

Throughout her internship, Margaret maintained a positive attitude and was responsive and available for tasks. She consistently took on new challenges and worked to expand her knowledge. Her time with us has prepared her to bring a thoughtful and diligent approach to any future role she undertakes.

Sincerely,

Michelle Claveria
Sr. Project Manager
